TECHNICAL SKILLS

Frontend

Angular React Next.js
React Native TypeScript

Backend

C# / ASP.NET .NET Web API
Entity Framework Node.js
Python

Databases

SQL Server PostgreSQL
Firebase Supabase

DevOps & Tooling

CI/CD Docker Dokploy
Graylog NX Monorepo Git

AI & LLM Tooling

MCP Claude Code Agent SDK
LLM Integration

EDUCATION

Associate · Computer Programming

Istanbul Üniversitesi
Sep 2023 - Jul 2027

Bachelor's · Computer Engineering

Istanbul Ticaret Üniversitesi
Sep 2021 - Jul 2023

High School · Science & Mathematics

Sâmiha Ayverdi Anadolu Lisesi

OPEN-SOURCE PACKAGES

codeagent-sync

npm

PROFILE

I build systems that solve real business problems, hold up in the field, and let teams spend less effort to ship more. From idea to a product that scales, with LLM-native tooling. Architecture, engineering and technical leadership in one place.

WORK EXPERIENCE

NarPOS Yazılım Tic. A.Ş.

Istanbul | Oct 2021 - Present

Senior Full Stack Developer

Jan 2025 - Present

Optimized queries on SQL Server and PostgreSQL and delivered performance work that cut system resource requirements to a minimum.

Built end-to-end products in an NX monorepo spanning Angular, React, .NET Web API, Entity Framework and Node.js.

Set up centralized logging with Graylog, with dashboards and alerting; automated error tracking and operational reporting.

Designed and ran CI/CD pipelines that made releases more reliable.

Built AI-assisted developer tooling and automation workflows with Model Context Protocol (MCP) integrations.

Chief Technology Officer

Oct 2024 - Jan 2025

Led the engineering team and owned the technical roadmap, phase plans and scaling strategy.

Ran requirements sessions with stakeholders and turned business needs into technical solutions.

Reported sprint progress and technical documentation to management on a regular cadence.

Full Stack Developer

Jul 2022 - Oct 2024

Developed the company's web, mobile and desktop apps (Angular, React Native Expo, .NET WinForms).

Designed and built the C# / ASP.NET Web API layer; ran migrations and schema management on SQL Server.

Took an active part in sprint planning with Scrum and Agile.

Customer Relations Specialist

Oct 2021 - Jul 2022

Analyzed and solved customer installation and support needs on site and through the call center.

Handled heavy database administration and scripting in SQL.

Angular React .NET Web API PostgreSQL NX Monorepo CI/CD Graylog MCP Team leadership
Project management Technical roadmap Stakeholder communication

FEATURED PROJECTS

Ege Çocuk

egecocuk.com.tr

Architecture · Engineering · Project management · DevOps | 2025 - Present

A QR resolver built on never-deleted opaque IDs, versioned content with rebind and rollback, and two Next.js apps (web + admin) sharing a domain core. Health-gated auto-deploys on push.

Tezgahtar

tezgahtar.tr

Architecture · Engineering · Product · DevOps | 2026 - Present

A from-scratch .NET 10 + PostgreSQL API and an Nx monorepo with web POS, Electron desktop and marketing site. Pricing, discount, barcode and receipt logic live in a pure, tested shared package; printing routes through a port/adaptor layer to Electron, a local agent or the browser.

NarPOS

narpos.com.tr

Architecture · Engineering · DevOps | 2021 - Present

A modular WPF desktop POS that brings ticket, table, menu, inventory and reporting modules, a kitchen display, handheld terminals, ECR/payment devices and delivery, e-invoice and ERP integrations together on one database.

AI Tooling & Open Source

github.com/sametbrr

Architecture · Engineering · AI integration | 2025 - Present

In-product, a report assistant and a docs-grounded technical assistant; outside, MCP servers and Claude Code plugins that automate developer workflows - open source and installable from one marketplace.
